Amendment dated Oct. 17, 2005
Reply to Office Action of June 16, 2005
Docket No. BOC9-2001-0043 (290)

13. (New) A method of call conferencing using a voice browser comprising:
establishing a voice browsing session between a calling party and the voice browser;
receiving an inbound call from an additional party;
identifying a dialed number identification service (DNIS) within said inbound call;
routing said inbound call to the voice browser based upon the DNIS; and
adding said inbound call to said voice browsing session, said adding providing a voice communications link between said calling party and said additional party.
14. (New) The method of claim 13, wherein said adding step conferences selected ones of a plurality of additional parties into said voice browsing session.
15. (New) The method of claim 13, wherein said adding step comprises:
determining whether said inbound call is associated with an active voice browsing session; and
if said identifier is associated with an active voice browsing session, routing said inbound call to the voice browser associated with said active voice browsing session.
16. (New) The method of claim 15, wherein said adding step further comprises:
determining whether the voice browser associated with said inbound call is configured for multiple callers.
17. (New) The method of claim 15, wherein said adding step further comprises:
aggregating a voice data stream of said additional party with a voice data stream of said calling party into a single voice data stream; and
sending said single voice data stream for processing to the voice browser.
